

## Quality Policy Statement

EPIC Sustainability Services Pvt. Ltd is committed to meeting the UNFCCC requirements and expectations of its CDM clients, in terms of the quality of the services we provide. We aim to promote and encourage continuous improvement of the quality of Validation and Verification/ Certification services.

We are committed to conduct the Validation and Verification/ Certification services impartially and effectively manage conflicts of interest to ensure its objectivity.

As a fundamental and integral part of our business strategy, we aim to be accredited as a major international certification body and conduct our business by maintaining a quality management system in conformance with the latest CDM accreditation Standard and other applicable rules and guidelines. We also undertake to effectively manage our customers and train our staff and ensure quality of our certification services by being committed to the accreditation and regulatory bodies' requirements whose approval we secure and maintain.

We are committed to safeguard the confidentiality of information obtained or created during the course of Validation and Verification/ Certification functions except where, Decision 3/CMP.1 or any other subsequent COP/MOP decision requires them to be publicly available.

We are committing ourselves to a strategy of continual improvement in all our processes. We will strive to ensure that our client's meet the intent of their GHG programs by employing rigorous auditing methodology. Our team adheres to the directives of the UNFCCC/CDM and other program procedures and requirements from time to time.

This policy is communicated to all employees including external resources and other stakeholders as appropriate and the same will continue to be available through the company website.
